Route End	Wiesenweg

Description

momentan GESCHLOSSEN

Iss-Though
Over a short connector on a gravel path you reach at the height of Seppi's restaurant the trail "Iss-Tough". Mighty riparian curves, big waves, jumps and steep terrain, the single trail Iss-Tough provides everything what an ambitious biker heart desires. After crossing the road, the trail moves first into the forest. Over stages and riparian curves leads the track out into the lift line of the gondola "Isskogelbahn" in which the track with impressive riparian curves back and forth meanders. In front of viewers, which observe out of the gondola, should no weakness be showed, so always with a nice style over the waves. The trail leads into the "Iss-Flow", but also can be continued. The last meters to the hut "Rossl Alm" run first on the Iss-Flow and then on the track.
