Klettersteig Talbach

Description

Beautifully landscaped via ferrata – right next to the Talbach waterfall! The via ferrata is built in such a way that you can climb slowly. The easy entry area is ideal for beginners and children. After each increase in difficulty there is an emergency exit to the path. The main part addresses the advanced via ferrata climber. The highlight are certainly the two very long rope bridges, the last of which ends directly above the outflow of the reservoir – in spring or in heavy rainfall there is a roaring waterfall.
Difficulty A-D/E
Rental of via ferrata sets right at the entrance – www.aktivzentrum-zillertal.at
