Hoogte bergafwaarts	702 hm
Het hoogste punt	2279 m
Route Start	Königsleiten village cable car mountain station
Route End	Holiday village Königsleiten

Description

EVERYONE CAN YOODLE! At the various experience stations along the yodel hiking trail, simple, traditional yodels await you to imitate (yodel booklet available at both mountain stations). An audio station first plays the entire yodel and then the 1st and 2nd voices separately. First, everyone should try their voice alone, then you can sing the yodel together.

Yodel Trail Königsleiten

To enable everyone to experience the yodel hiking trail, the path begins at the mountain station of the Königsleiten village cable car (ascent by cable car). The first station is directly at the Gipfeltreffen restaurant. The yodel hiking trail is open in summer and free for everyone to use. Accessibility depends on the cable car operating hours from June to October.

The path is also stroller-friendly. The hiking route leads from the mountain station of the village cable car (refreshments possible at Gipfeltreffen and Larmachalm) to the Königsleiten holiday village. Of course, the trail can also be walked in the opposite direction.

TIP: GipfelLiner & Gipfelwelt Königsleiten

At the mountain station of the village cable car, young and old can experience a unique saga experience at Kröndlwormsee as well as the exciting GipfelLiner. Numerous experience stations, such as a wooden ball run, make the day at this natural playground something special.

The **GipfelLiner** Königsleiten is a kind of flying fox / zipline and offers all Zillertal Arena guests and visitors even more fun, action, and an incomparable bird's eye view - and the absolute highlight - the GipfelLiner runs over the Königsleiten retention basin at 2,300 m above sea level. From the 3 m high starting platform at an impressive 2,300 m elevation to the landing platform, you overcome a height difference of 65 m.
